

Honeypot_simple DOCUMENTATION

Run using command `python3 honeypot_simple.py`

Listening on a Port: The script listens on port `2222` (commonly associated with SSH).

SSH Banner: It mimics an SSH server by sending a fake SSH version banner to the attacker.

Logging: Logs all connection attempts and any data sent by the attacker.

Minimal Response: Sends a standard "permission denied" message to simulate a real SSH server behavior.
